O FOGUETE QUE QUASE NÃO DECOLOU
@ruisereno

@bertie.barton

The button size could be a bit smaller. Maybe reducing the padding.
Also, the copy needs to be short and easy to read.

@ruisereno

This a multi-line chat message from Bertie that will take more than just one line of text, which means it will take two or more lines.

@bertie.barton I'll have new updates later this afternoon.

WHY?

Why not?
WHY?

Why not?
SpaceTalk – Who’s up for building an open-source Slack, just like how Telescope is managed?!

Timbrandin

Just a thought, would be cool to work together with some people to build an open-source version of Slack that companies can setup within their firewall and gain control of their data.

I've already build a working prototype of this: [http://github.com/studiointeract/meteor-slack](http://github.com/studiointeract/meteor-slack) for our next meetup [http://slides.com/timbrandin/meteor-slack](http://slides.com/timbrandin/meteor-slack) which will be in the form of a workshop and hackathon – and here's the presentation: [http://slides.com/timbrandin/meteor-slack](http://slides.com/timbrandin/meteor-slack)

Possible extensions:
- Notifications
- Mentions
- Private groups
- Direct messages

The idea is to build a rock solid base easily deployable on your own server or on Galaxy and a version which you can install on your mac like this project: [http://github.com/studiointeract/desktop](http://github.com/studiointeract/desktop)

Suggestion for name: Impact

Who's up for the challenge?
BOOM!

WE’RE RIGHT about being wrong...
BUT PEOPLE LIKED IT
BUT PEOPLE LIKED IT
BUT PEOPLE LIKED IT
COMMUNITY KEPT GROWING
OUT IN THE WILD
WE ARE
ONTO
SOMETHING
WE ARE ONTO SOMETHING OF CHATS!
7 REASONS WHY

WORDPRESS
1. Open source - GPLv2
2. You can host yourself
3. PHP's popularity
4. Easy to deploy (FTP)
5. Easy to extend plugins
6. Themes and white label
7. Hosting for everyone

ROCKET.CHAT
1. Also Open source - MIT !
2. Yes! Own your data!
3. JavaScript massive popularity
4. Docker Container (Official)
5. Packages System
6. Also themed and whitelabel!
7. Hosting Just Launched
   https://rocket.chat/hosting
Nice that you found that page! We considered all of them. Rocket.chat and Mattermost seemed like the best products. I don't like that Rocket.chat is made with Meteor and therefore Mongo only, we already ship and love PostgreSQL. Also, I met Ian from the Mattermost team at YC camp and we hit it off together.

It's a shame you didn't talk to us too. There are a lot of benefits of using Meteor. First, it plans to be DB agnostic, so PostgreSQL support will come in the next version, and many other DBs. So if that was the main reason, it's a bit short-sighted. Also, we have already submitted our Mobile apps to Google Play and Apple Store. Sure the first version is Hybrid, but they work really well, and the native version is on the making. We are also working with a team from the US army to implement the DoD Manual 5200.01V2 so they can use it at government agencies too. On scalability, we are pushing the limits with a deployment that has 40k users for the Federal University in Brazil. Hopefully GitLab will not commit to a single option so early, that would be premature at this point, and maybe we can work together to offer another chat option.

I send you an email to set up a call.

On behalf of the Rocket.Chat team, I am ready to announce that we will work with GitLab to get our chat solution on Omnibus too.

Hey Gabriel, I actually have another opportunity for you, if you're interested. We'd love for you to come speak at our next Meteor Devshop event on Thurs Sept 24, in San Francisco. Just a demo and a bit of the Rocket.Chat story. We can livestream and record your talk and promote it throughout the community.

What do you think? :-}

COLLABORATION WE TRUST
At Knecty, Rocket.Chat and our other applications need to be able to quickly access various types of data to provide a seamless solution for our users. With MongoDB 3.2, we will now be able to implement the data governance we’re seeking, without sacrificing agility that comes from dynamic schema."

— Gabriel Engel, Founder and CEO at Knecty

to me, Harry

Gabriel,
Been a while since we chatted but it seems things are going well at rocket.chat.
Harry Weller, one of our investors as NEA, was introduced in chatting with you.

to Eliot, me

Eliot,

Thanks for the introduction.

Gabriel,

Ever since the press release below, I've been following your endeavors. It's been very impressive and I was wondering if you'd have time to "chat".

Cheers,

harry weller
